

I met Borislav 12 years ago when we were working on a project for wireless networking of two facilities at Kesten.

After this successful project, our cooperation started, which continued on various other projects than implementation of Mail server, Firewall, network upgrade and domain server at Ecos. After completing system integration, he went on to work as a graphic designer.

For the needs of a couple of companies where I worked, Borislav did a lot of graphic things from branding vehicles, creating newsletters, flyers, brochures, business cards, diaries, letterheads, rollup banners and more. Borislav is a very social person and very detailed in his work, his conceptual solutions were adopted and implemented with very few corrections.

He knew how to recognize our needs and turn them into one interesting design. He always did a perfectly done job, and he followed every project to the end to make sure everything was laid just right.
